regulations.

According to 1907/2006 (REACH) Article 31, 2015/830/EU and 1272/2008/EC Date: 19.09.2017 – Version A

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal firefighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures:

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2 Environmental precautions:

The product must not penetrate the sewer system or come into contact with surface water or ground water.

6.3 Methods and material for containment and cleaning up:

Collect the leaked product into a suitable container. If the product is flammable, use explosion-proof equipment. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in section 13.

6.4 Reference to other sections:

Any information on personal protection and disposal is given in sections 8 and 13.

7. HANDLING AND STORAGE

7.1 Precautions for safe handling:

Ensure that there is an adequate earthing system for the equipment and personnel. Avoid contact with eyes and skin. Do not breathe powders, vapours or mists. Do not eat, drink or smoke during use. Wash hands after use. Avoid leakage of the product into the environment.

7.2 Conditions for safe storage, including any incompatibilities:

Store only in the original container. Store the containers sealed, in a well-ventilated place, away from direct sunlight. Store in a well-ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3 Specific end use(s):

Information not available.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters:

| PROPAN-2-OL | | | | | |
|------------------------|---------|--------|-----|------------|-----|
| Threshold Limit Value. | | | | | |
| Туре | Country | TWA/8h | | STEL/15min | |
| | | mg/m3 | ppm | mg/m3 | ppm |
| WEL | GRB | 999 | 400 | 1250 | 500 |
| TLV | GRC | 980 | 400 | 1225 | 500 |
| TLV-ACGIH | | 492 | 200 | 983 | 400 |

8.2 Exposure controls:

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

8.2.1 Eye protection:

Wear airtight protective goggles (see standard EN 166).

According to 1907/2006 (REACH) Article 31, 2015/830/EU and 1272/2008/EC Date: 19.09.2017 – Version A

| 8.2.2 | Skin protection: | | | | | |
|---|---|--|--|--|--|--|
| | Hand protection: | | | | | |
| | Protect hands with category III work gloves (see standard EN 374). The following should be considered when choosing work glove material: compatibility, degradation, failure time and | | | | | |
| | The following should be considered when choosing work glove material: compatibility, degradation, failure time and | | | | | |
| | | resistance to chemical agents should be checked before use, as it can be unpredictable. The | | | | |
| | gloves wear time depends on the duration and type of use. | | | | | |
| | Other skin protection: | | | | | |
| | | ong-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO | | | | |
| | 20344). Wash body with soap | and water after removing protective clothing. | | | | |
| 8.2.3 | Respiratory protection: | | | | | |
| | If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a | | | | | |
| | mask with a type A filter whos | e class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard | | | | |
| | EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol | | | | | |
| | sprays, fumes, mists, etc.) com | bined filters are required. | | | | |
| | Respiratory protection devices | s must be used if the technical measures adopted are not suitable for restricting the worker's | | | | |
| | exposure to the threshold value | es considered. The protection provided by masks is in any case limited. | | | | |
| | | odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the | | | | |
| | case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or | | | | | |
| | external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory | | | | | |
| | protection device, see standar | | | | | |
| 8.2.4 | Environmental exposure controls: | | | | | |
| 0.2 | | anufacturing processes, including those generated by ventilation equipment, should be | | | | |
| | | with environmental standards. | | | | |
| | | | | | | |

| 10.6 | Hazardous decomposition products: |
|------|---|
| | In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released. |
| 11. | TOXICOLOGICAL INFORMATION |
| | In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product. |
| 11.1 | Information on toxicological effects: |
| | <u>Metabolism, toxicokinetics, mechanism of action and other information</u> Information not available <u>Information on likely routes of exposure</u> |
| | Information not available |
| | Delayed and immediate effects as well as chronic effects from short and long-term exposure |

| | |
| 12. | ECOLOGICAL INFORMATION |

No specific data are available for this product. Handle it according to good working practices. Avoid littering. Do not contaminate soil and waterways. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation. Please take all the proper measures to reduce harmful effects on aquifers.

According to 1907/2006 (REACH) Article 31, 2015/830/EU and 1272/2008/EC Date: 19.09.2017 – Version A

14.6 Special precautions for user: Not applicable.

14.7 Transport in bulk according to Annex II of Marpol and the IBC Code: Information not relevant.

15. <u>REGULATORY INFORMATION</u>

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture:

Seveso Category - Directive 2012/18/EC: None

<u>Substances in Candidate List (Art. 59 REACH).</u> Based on available data, the product does not contain any SVHC in percentage greater than 0.1%.

Substances subject to authorisation (Annex XIV REACH).

None.

Substances subject to exportation reporting pursuant to (EC) Reg. 649/2012. None.

Substances subject to the Rotterdam Convention. None.

Substances subject to the Stockholm Convention. None.

Healthcare controls.

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

Regulation (EC) No. 648/2004.

The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in Regulation (EC) No. 648/2004 on detergents.

15.2 Chemical safety assessment:

No chemical safety assessment has been processed for the mixture and the substances it contains.

| Skin Sens. 1 | Skin sensitization, category 1. |
| STOT SE 3 | Specific target organ toxicity - single exposure, category 3. |
| Aquatic Acute 1 | Hazardous to the aquatic environment, acute toxicity, category 1. |
| Aquatic Chronic 1 | Hazardous to the aquatic environment, chronic toxicity, category 1. |

According to 1907/2006 (REACH) Article 31, 2015/830/EU and 1272/2008/EC Date: 19.09.2017 – Version A

| Date: 19.09.2017 | | BARBOUNAKIS |
|------------------|---|-------------|
| H225 | Highly flammable liquid and vapour. | |
| H301 | Toxic if swallowed. | |
| H311 | Toxic in contact with skin. | |
| H331 | Toxic if inhaled. | |
| H314 | Causes severe skin burns and eye damage. | |
| | , . | |
| H319 | Causes serious eye irritation. | |
| H315 | Causes skin irritation. | |
| H317 | May cause an allergic skin reaction. | |
| H336 | May cause drowsiness or dizziness. | |
| H400 | Very toxic to aquatic life. | |
| H410 | Very toxic to aquatic life with long lasting effects. | |
| EUH210 | Safety data sheet available on request. | |
